

Product Fact Sheet

NaturePost™ BioComposite Marker Post

Description

The Rhino NaturePost is composed of over 50% natural biomaterial, with recycled plastic and is a durable, cost-effective bio alternative to standard 4" x 4" wood posts with NO SCRAP VALUE. *100% recyclable.*

Top of post looking down

Environmentally Friendly

Post is composed of over 50% cellulose fiber - a high biomaterial content *plus 100% recyclable.*

Gunshot Resilient

Gunshots do not cause chipping or splinters.

No Scrap Value

Unlike wood posts the NaturePost is difficult to ignite - cannot be easily used for firewood.

Temperature Stable

NatureSign remains stable from -40° F to 210° F.

Durable

Stands up to harsh environmental conditions. Protected with UV-stabilizers, Mold/Mildew/Fungus inhibitors with antibacterial protection. Moisture and water resistant. Will not splinter or rot.
